## TOP COAT AGENTS

## PRODUCT INTRODUCTION / SPECIFICATIONS

MESG's Top Coat Agents is one of the most refined and flexible for usage in the industry.

These additives added to our topcoat allow users to have an added option of a matte, anti-slip finish, or both.

It also allows for added protection due to its thick and gritty characteristics in extreme environments where added scratch, traction, and damage control are desired.

- **Scuff and Abrasion Resistant**
- **Superior Hardness**
- **Narrow Particle Distribution**
- **Highly Chemical Resistant**
- **Highly Impact Resistant**

# APPLICATION

## WHAT CAN IT BE USED IN?

Below are a few examples:

- Polyurethane
- All Epoxy
- Paints & Varnishes
- Structured Paint
- Road Marking Paint

## HOW MUCH DO YOU NEED?

**Matte:** 6% of Part A & B

**Gloss Anti-Slip:** 2% of Part A & B

**Matte Anti-Slip:** 4% Anti-Slip + 6%  
Matte of Part A & B

# HOW TO MIX

## WHEN MIXING INTO TOP COAT

Pre-mix the Agents in Part A Top Coat before adding Part B. This will minimize mixing time once Part B (hardener) is added.

Mix until all the agents are blended into Part A.

### NOTE:

Add the Part B (hardener) when you're ready to apply.
